Instructor: Dr. Paul Lin

Course: ENG W421

Instructor: Dr. Karen Griggs

Faculty Advisor: Dr. Thomas Laverghetta

Abstract

The purpose here is to discuss all that this report will entail. First of all, this project for the final senior design project for the completion of the IPFW Electrical Engineering Technology Bachelor's degree program. The content of this report includes every aspect of the design. The first thing that this report discusses is the introduction of the project. The introduction starts off the report by giving background information of the idea behind the project and technology principles of the project. As the report progresses, the problem will be stated. Then, the solution of problem is proposed and why that particular solution was chosen. The requirements of the project are then stated and listed.

In the second half of the project, the report gets into the design of the project. The resource allocation and the design of the system is stated in further detail. As part of the design listing the block diagrams and the system schematics are shown as how the system will be put together. Finally, an updated schedule is given on when tasks are going to be performed along with scheduling for testing. The last parts of the project show the support of the faculty advisor. Also, the final piece of the project is the Bibliography, which lists the various sources that were used in the development of the idea behind the project. Finally, as part of this project report, a list of drawings and images will be included. Also, a list of parts used and components used will be included as part of how this project came together overall

Table of Contents

I. Title Page	
II. Abstract	
III. Preface	
IV. List of Illustrations	
1. Chapter 1	1
1.1. Introduction.....	1
1.2. Problem Topic.....	2
1.3. Background.....	3
1.4. Criteria and Parameters.....	4
1.5. Methodology.....	6
1.6. Primary Purpose.....	6
1.7. Overview.....	7
2. Chapter 2.....	8
2.1. Proposed Solution.....	7
2.2. Risk Assessment.....	9
2.3. Resource llocation.....	10
3. Chapter 3.....	12
3.1. System Design.....	12
3.2. Usability.....	13
3.3. Simulations and Testing.....	14

3.4.	System Construction and Unit Testing.....	16
3.5.	Final Testing A.....	18
3.6.	Final Testing B.....	19
3.7.	Summary.....	20
4.	References.....	22
5.	Appendices.....	23
5.1.	Appendix A.....	24
5.2.	Appendix B.....	25
5.3.	Appendix C.....	26
5.4.	Appendix D.....	27
5.5.	Appendix E.....	28
5.6.	Appendix F.....	29

List of Illustrations

Table 1 Requirements.....	10
Table 2 Risk Assessment.....	13
Figure 1 Transmitter.....	17
Figure 2 Receiver and Indicator.....	17
Figure 3 Testing Results.....	19
Figure 4 Switching Screen Shot.....	20
Figure 5 Circuit Schematic of Transmitter.....	21
Figure 6 Circuit Schematic of Receiver.....	21
